SKILLS

Languages: Java, Python, C, C++, C#, JavaScript, PHP, HTML, CSS, Swift, Assembly, Bash

Frameworks/Libraries: Django, Flask, React, Vue.js, Node.js, Express.js, TypeScript, jQuery, MySQL, MongoDB, Bulma

Tools: VS Code, Git, Eclipse, XCode, Docker

PROJECTS

Spotify API | Python, Flask, MongoDB, MySQL, JavaScript

Nov 2023-Dec 2024

- Developed a full stack web application using Flask and Spotify API to give users customizable settings in their automated Spotify playlists such as the “Daily Drive” allowing for a more personalized experience curated by the user.
- Created a responsive database using MySQL and MongoDB to store large quantity of user playlists, podcast, and Spotify data which decreased playlist creation and load time by 70%, giving users with large playlists a smooth experience.

DiscordBot | Python, Discord.py

Jan 2024

- Built auto-moderation and remote start functionality for game servers using Python and Batch, eliminating the need for constant server staff converge and resulting in an increase in member playtime.
- Created a simplistic AI chat bot using JSON to tokenize phrases and Python for Natural Language Processing to create fun dialogue with custom commands and increase community engagement.

Codies.xyz | Node, Express, JavaScript

Dec 2023

- Recreated a deprecated web application using Express and Node.js to provide a minimalistic version for friends and family to enjoy.
- Increased player count and retention by using pure JavaScript to develop a lightweight version of the app with minimal backend code, decreasing webpage load times and increasing responsiveness allowing more players to use their phone.

WebVizOS | Java, PHP, jQuery, Ajax, Bootstrap, JavaScript

Nov 2023

- Led 5-person team in developing an educational website using Java and PHP to visualize the functionality of operating systems and coordinating weekly meetings to keep component delivery on track via Gantt chart.
- Managed front-end development using Bulma and repaired Java code, restoring functionality to 60% of the website.

WORK EXPERIENCE

Medical Assistant – Vascular Surgery

September 2024 - Present

Vassar Brothers Medical Center (Nuvance/Northwell)

Poughkeepsie, NY

- Restructured patient pre-charting procedures to resolve patient documentation errors and scheduling issues, increasing patient satisfaction scores by 10% and reducing wait times by approximately 10 minutes.
- Reduced wait time by developing new patient intake protocols, decreasing office visit wait times by 10 minutes.

Emergency Medical Technician – Basic

March 2019 - Present

Empress EMS (Mobile Life Support Services)

Poughkeepsie, NY

- Decreased stress on 911 system by leading rapid and effective emergency scene management in assessment of behavioral, traumatic, and medical emergencies, resulting in quicks turnover time and more positive patient outcomes.
- Eliminated system down time by providing employee trainings on equipment and treatment protocols during down time which reduced required training time and satisfied company metrics significantly earlier than deadlines.
